ABSTRACT

The abstract should provide a concise summary of the study and include the following elements:

- Purpose of the study
- Methodology employed
- Key findings
- Conclusions
- Recommendations
- Practical and/or theoretical implications

Do not include citations, abbreviations, tables, figures, or references in the abstract.

Keywords: *Provide 3–5 keywords, listed in alphabetical order and separated by semicolons (;). Do not repeat words that already appear in the title unless necessary*

:

INTRODUCTION

Introduce the research problem and its significance. Discuss the background of the study, relevant literature, research gaps, and rationale. Clearly explain why study is important and how it contributes to existing knowledge.

RESEARCH QUESTIONS /OBJECTIVES

Clearly state the research questions, hypotheses, or objectives that guide the study.....

METHODS

Describe the procedures used in conducting the study in sufficient detail to allow replication. Include information on the research design, study setting or locale, study period, participants or samples, sampling technique, research instruments, validity and reliability results (where applicable), data sources, data collection procedures, and methods of data analysis. If established methods were adopted from previous studies, cite the original source and explain any modifications made. The methodology should be presented clearly and systematically to demonstrate the rigor, validity, and credibility of the study.

FINDINGS

Present the findings objectively using tables, figures, graphs, or narratives where appropriate. Results should directly address the research questions or objectives.....

DISCUSSION

Interpret and explain the findings; do not simply summarize the results. Relate the results to existing literature, theories, and previous studies. Highlight implications, similarities, differences, and possible

explanations for the findings.....

CONCLUSION

Summarize the major findings of the study and state the overall conclusions drawn from the results. Do not introduce new information.....

RECOMMENDATIONS

Provide practical recommendations based on the findings of the study. Recommendations should be realistic and evidence based.....

LIMITATIONS OF THE STUDY

Discuss the limitations encountered during the conduct of the research and their possible effects on the findings.....

FUTURE RESEARCH DIRECTIONS

Suggest areas for future studies that may extend, validate, or improve the current research.....

ETHICS STATEMENT

For studies involving human participants, indicate that informed consent was obtained and that ethical principles were followed. If applicable, provide ethics approval details.....

REFERENCES

List all references cited in the manuscript using APA 7th Edition format. References should be relevant, current, and primarily drawn from peer-reviewed scholarly sources. Authors are encouraged to cite recent literature, with at least 70% of references published within the last five years. DOI links should be included whenever available.

AI DISCLOSURE STATEMENT

During the preparation of this work, the author(s) used [NAME TOOL / SERVICE] in order to [e.g., generate text, check grammar, analyze data, or assist with literature search]. After using this tool/service, the author(s) reviewed and edited the content as needed and take(s) full responsibility for the content of the published work.
